Bulletin of the World Health Organization 2015;93:3. Page 2 Millennium development goal Targets Progress on specific indicators Goal 4: Reduce child mortality Reduce by two thirds between 1990 and 2015, the under-five mortality rate ○ Under 5 mortality decreased by 47% to date (in 2012, 6.6 million children under 5 died; majority of deaths occur in world’s poorest regions). ○ Neonatal mortality has fallen by a third, but proportion of deaths in first 28 days of life has increased. ○ Proportion of children covered by one dose of measles vaccine increased from 72% to 84% (from 2000–2009); no change past few years. Globally 21.2million infants unvaccinated in 2012. Goal 5: Improve maternal health Reduce by three quarters, between 1990 and 2015, the maternal mortality ratio ○ Maternal mortality ratio fell by 45% between 1990 (380 deaths per 100,000 live births) and 2012 (210 deaths per 100,000 LB). Proportion of deliveries attended by skilled health workers increased from 56% to 68% in developing countries. Achieve, by 2015, universal access to reproductive health ○ 83% of women in developing countries who see a health worker once in pregnancy increased to 83%, but only 52% have the 4 recommended visits. ○ Births to adolescent girls have declined – e.g. from 88 to 50 births per 1000 girls in South Asia, but still 117 births per 1000 girls in sub-Saharan Africa, and 76 in Latin America/Caribbean. ○ Unmet need for family planning declined from 17-12%. Goal 6*: Combat HIV/AIDS, malaria and other diseases Have halted by 2015 and begun to reverse the spread of HIV/AIDS ○ Number of new HIV infections (adults) declined 38% between 2001 and 2013. Achieve, by 2010, universal access to treatment for HIV/AIDS for all those who need it ○ In sub-Saharan Africa, 39% young men and 28% young women (aged 15–24 years) have comprehensive knowledge of HIV. ○ 12.9 million people globally received anti-retrovirals in 2013. Have halted by 2015 and begun to reverse the incidence of malaria and other major diseases ○ Malaria mortality declined 42% between 2000 and 2012. ○ 87% of 6.1 million newly diagnosed TB patients received therapy.
